

# Estimating Accuracy Essentials (Part 1)

In the first installment of our multi-segment Estimating Accuracy Essentials seminar series, we'll explore how to accurately diagnose all the operations involved in one of the industry's highest volume segments: light damage, fast track, SINGLE PANEL REPAIRS!

This will be a highly interactive, can't miss discussion where **we'll identify REASONABLE, REALISTIC, and DOCUMENTED METHODS for uncovering and capturing billable labor hours for OPERATIONS YOU'RE PERFORMING TODAY!!**

## DISCUSSION TOPICS – AGENDA OVERVIEW

### The 'Y' Factor

A mainstay of our seminars is a discussion of the REAL reasons behind the objectives. We'll discuss the far-reaching, significant impact the quality of our estimates has on the **quality of life for everyone on the team...their families...and the entire industry!**

### Single Panel Repairs

There are TREMENDOUS opportunities to **fairly and reasonably improve** our repair plans for 'simple' **single panel damages**. We'll review proven techniques for analyzing single panel repairs and focus on understanding, approximating, and using a single panel price **prior** to writing the estimate and **why**.

### Estimate Comparison!

Based on photos we distribute, **each attendee will be asked to write and submit a damage estimate prior to the seminar**. We'll compile the results and use the information for a VERY interactive discussion!

### Best-In-Class Estimating Techniques

What makes an estimate best-in-class?? We'll review and discuss multiple **examples of complete and thorough estimates** and identify **how YOU can incorporate the techniques** into YOUR repair plans! PLUS we'll tie in the importance of job costing!

### Local Market Metrics

Using data from YOUR local and regional market, we'll share **industry averages and top quartile performance in severity and more!**

The material we'll discuss is **applicable to ALL shops** regardless of facility size, sales volume or your insurance relationships!
